TOXICOLOGY

VOLUME CONTENTS

Volume 74 (1992)

Characterization of gold in urine and bile following administration of gold sodium thiomalate with chelating agents to rats **(Presumably gold-chelator complexes are present)**
by S. Kojima, Y. Takahashi, M. Kiyozumi, T. Funakoshi and H. Shimada (Kumamoto, Japan) . 1–8

Cadmium exposure inhibits the prolactin secretory response to thyrotrophin releasing hormone (TRH) in vitro **(A dose- and time-response study with isolated anterior pituitary cells)**
by C. Winstel and P. Callahan (Oxford, OH) 9–17

Modulation of aflatoxin B_1 biotransformation in rabbit pulmonary and hepatic microsomes **(Exposure to PAH-type compounds prior to aflatoxin might convey a protective effect)**
by J.M. Daniels and T.E. Massey (Ontario, Canada) 19–32

Antioxidant-dependent inhibition of diquat-induced toxicity in vivo **(It is suggested that diquat hepatotoxicity is mediated via lipid peroxidation)**
by T.W. Petry, G.H.I. Wolfgang, R.A. Jolly, R. Ochoa and W.J. Donarski (Kalamazoo, MI) ... 33–43

High carbonyl reductase activity in adrenal gland and ovary emphasizes its role in carbonyl compound detoxication **(Carbonyl compounds that escaped detoxification in the liver may be metabolized in the ovaries and adrenals)**
by E. Maser, J.G. Hoffmann, J. Friebertshäuser and K.J. Netter (Marburg/Lahn, Germany) 45–56

Differences between rats and mice in the immunosuppressive activity of 2-methoxyethanol and 2-methoxyacetic acid **(Fischer 344 rats are sensitive to the immunosuppressive effects, C57BL/6J mice are not)**
by R.J. Smialowicz, M.M. Riddle, W.C. Williams, C.B. Copeland, R.W. Luebke and D.L. Andrews (Research Triangle Park, NC) 57–67

D-Penicillamine and prussian blue as antidotes against thallium intoxication in rats **(Combined penicillamine — prussian blue treatment affords significant protection)**
by C. Rìos and A. Monroy-Noyola (Mèxico, Mèxico) 69–76

Role of *para*-hydroxylation in phensuximide-induced urotoxicity in the Fischer 344 rat **(The toxic molecular species remains to be identified)**
by G.O. Rankin, K.W. Beers, D.W. Nicoll, D.K. Anestis, H.C. Shih, P.I. Brown and J.L. Hubbard (Huntington, WV) 77–88

Announcements 89

Review Article

A review of the literature on potential reproductive and developmental toxicity of electric and magnetic fields **(No conclusive epidemiologic or experimental studies are available that would show adverse reproductive effects)**
by N. Chernoff, J.M. Rogers and R. Kavet (Research Triangle Park, NC; Palo Alto, CA) 91–126

Formation of the semiquinone anion radical from *tert*-butylquinone and from *tert*-butylhydroquinone in rat liver microsomes **(Mechanisms of biological radical formation are demonstrated)**
by B. Bergmann, J.K. Dohrmann and R. Kahl (Berlin and Göttingen, Germany) 127–133

Validation of two in vitro test systems for estrogenic activities with zearalenone, phytoestrogens and cereal extracts **(Phytoestrogens can be measured by their promotive action on gene expression in cell culture)**
by U. Mayr, A. Butsch and S. Schneider (Stuttgart, Germany) 135–149

Behavioural effects of neonatal metallic mercury exposure in rats **(Mercury vapour inhalation retards behavioural and learning abilities)**
by A. Fredriksson, L. Dahlgren, B. Danielsson, P. Eriksson, L. Dencker and T. Archer (Uppsala and Gothenburg, Sweden) 151–160
Investigation of the role of estrogenic action and prostaglandin E_2 in DDT-stimulated rat uterine contractions ex vivo **(Effects do not appear to be mediated through prostaglandin release)**
by D.R. Juberg and R. Loch-Caruso (Ann Arbor, MI) 161–172
Combined exposure to NO_2, O_3 and H_2SO_4-aerosol and lung tumor formation in rats **(Development of chemically induced lung tumors is enhanced)**
by T. Ichinose and M. Sagai (Ibaraki, Japan) 173–184
Effect of ICRF-187 on the pulmonary damage induced by hyperoxia in the rat **(Chelation of iron may prevent formation of oxygen free radicals and mitigate oxygen toxicity in the lung)**
by Y. Fukuda, E.H. Herman and V.J. Ferrans (Bethesda, MD; Washington, DC; Tokyo, Japan) . 185–202
Late postnatal growth in the dentate area of the rat hippocampus compensates for volumetric changes caused by early postnatal toluene exposure **(Four months after the damage an increase in hippocampal size indicates morphological repair)**
by L. Slomianka, J. Rungby, S. Edelfors and A. Ravn-Jonsen (Aarhus and Copenhagen, Denmark) . 203–208
Dietary glucarate-mediated inhibition of initiation of diethylnitrosamine-induced hepatocarcinogenesis **(Calcium glucarate is an effective chemopreventive agent)**
by O.A. Oredipe, R.F. Barth, C. Dwivedi and T.E. Webb (Columbus, OH; Brookings, SD) 209–222
Benznidazole-induced ultrastructural alterations in rat adrenal cortex. Mechanistic studies **(A nitroreductive activation of benznidazole may produce reactive metabolites that cause organelle damage)**
by C.R. de Castro, E.G. Diaz de Toranzo and J.A. Castro (Buenos Aires, Argentina) 223–232
The toxicokinetics of mercury in mice offspring after maternal exposure to methylmercury — effect of selenomethionine **(Cross-fostering experiments show differences in mercury distribution between transplacentally and postnatally exposed mice)**
by J.B Nielsen and O. Andersen (Odense, Denmark) 233–241
Proliferative responses of quail aortic smooth muscle cells to benzo[*a*]pyrene: implications in PAH-induced atherogenesis **(Benzo[*a*]pyrene modulates quail aortic smooth muscle cells to a more proliferative phenotype)**
by X. Ou and K.S. Ramos (College Station, TX) 243–258
Book Review 259–260
Contents of Journals Relating to Toxicology 261–262
Subject Index Volume 74 263–265
Author Index Volume 74 267
Contents Volume 74 269–270
